

# FACILITIES SUMMER PROJECT REPORT

2023

While students were out enjoying the sun of summer, the Good Spirit School Division Facilities Team was busy working on projects in various locations. The talented team of Chad Rennie, Chad Hicks, Regan Cobb, Dean Katzberg, Derek Ferguson, Regan Bohn, Austin Boychuk, and Mason Bradford worked tirelessly improving our facilities.

## Dr. Brass School

Due to the rise in enrollment, additional classroom space became necessary, leading to the conversion of the gymnasium mezzanine into two classrooms.

## P.J. Gillen School

In the final stage of the three-phase project, five classrooms underwent renovations, complete with new paint and cabinetry. Additionally, the entranceways to the school have been upgraded with resilient carpeting.

# Churchbridge Public School

A revitalization was carried out on the school's main entrance and corridor. Outdated and damaged flooring was replaced with contemporary resilient flooring and new carpeting, giving the space a fresh and updated look.

Beneath the bustling activity of students and staff, the boiler room underwent enhancements, including the replacement of the floor, installation of new boilers, and a water heater upgrade. Ainsworth Mechanical successfully executed the project, which commenced in spring and concluded in the fall.

# Norquay School

Norquay School saw the completion of a couple of exciting projects over the summer. Three classrooms underwent comprehensive renovations, encompassing upgrades to flooring, paint, and millwork.

Norquay also observed the preparation of a classroom for the Pre-K program, along with the establishment of a fenced outdoor area.

# Kamsack Comprehensive School

The senior gymnasium washrooms are now sporting new fixtures and new partitions.

# Victoria School

The gym was treated to a new rubberized sports floor.

# Columbia School

This summer marked the establishment of the Michif Early Learning Program space. The renovation involved the conversion of a classroom and the addition of a washroom. The construction included the incorporation of a loft space within the classroom and the installation of new cabinetry. Further enhancements comprised the introduction of a new shed for outdoor storage and the creation of a fenced-in play area.

# Esterhazy High School

The refurbishment of a pre-existing classroom encompassed the installation of computer workstations, new flooring, paint, lighting, and the establishment of a teacher workroom. As part of this enhancement, a comprehensive rewiring of electrical and data systems was also undertaken.

# Yorkton Regional High School

In July, All Season completed the expansion and recap of the parking lot.

# Yorkdale Central School

All Season was also busy at Yorkdale Central School adding asphalt to various areas to enhance drainage. This work was completed in August.
