

# FACILITIES SUMMER PROJECT REPORT

## 2024

The Good Spirit School Division continuously strives to maintain and improve its school facilities to provide a learning environment that supports the well-being of students and staff.

These projects would not be possible or successful without the collaboration, cooperation, and patience of school staff, administrators, and students.

## Melville Comprehensive School

The existing mechanics area grate was removed from the concrete and replaced with a new, improved style of drainage grate.

A standard washroom was transformed into an accessible washroom.

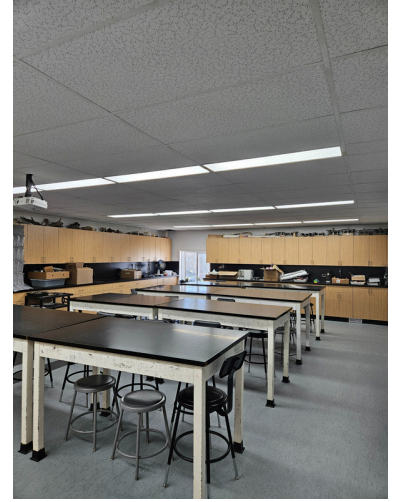

# Churchbridge Public School

Phase Two of a multiyear renovation project involved the science lab, gymnasium mezzanine, and a meeting room in the library. To maximize efficiency within the school, a wall was added to the mezzanine to convert the room into a flex space for band and art. The space received fresh paint, new flooring, and a new sink.

The science lab received new cabinetry throughout, flooring, paint and a new acoustic ceiling.

The remainder of the main corridor received paint and new flooring. A room was built within the library to be used for meetings or a break out space.

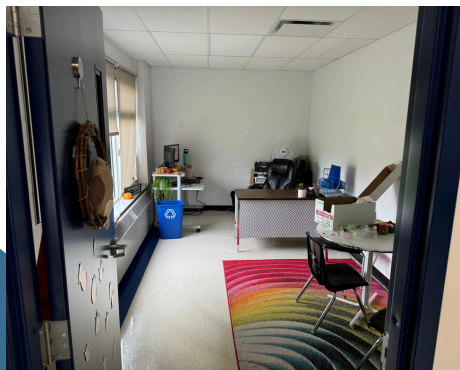

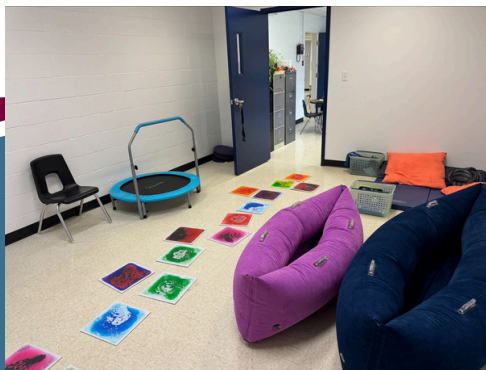

# Preeceville School

The entrance of the school was opened up to create a warm, inviting, and more efficient use of the space. The wall between the adjacent room was removed to create a space for the students to enjoy.

The Kindergarten room was relocated to a fully renovated space, creating an opportunity to transform the original room into a sensory area and a Student Support Teacher space.

## P.J. Gillen School

Shingles were replaced over the office area at P.J. Gillen School.

## Yorkdale Central School

Shingles were replaced over the student center at Yorkdale Central School.

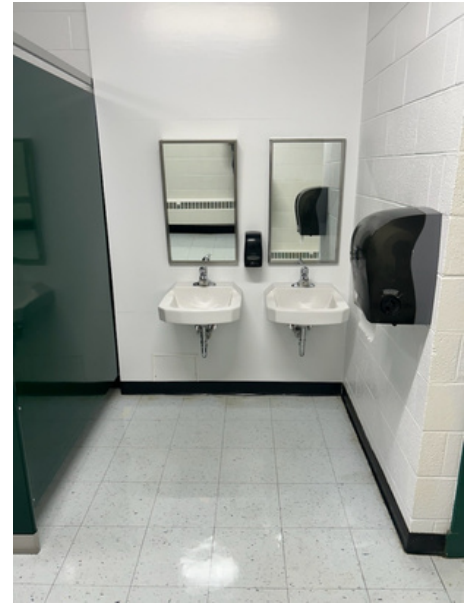

## Miller School

With a growing number of students, space is limited. Staff requested a collaborative space that could serve as a multifunctional hub. The renovation allowed two rooms to be repurposed into one breakout room that now provides a comfortable retreat for students to gather and learn.

# Saltcoats School

Two sets of washrooms had new fixtures, new partitions installed, and received a fresh coat of paint.

Phase One of a two-year project focused on the renovation of five classrooms and the library. These spaces underwent comprehensive renovations, encompassing upgrades to flooring, paint, and millwork.
